

The background of the page is decorated with abstract, flowing lines in red and yellow. These lines start from the top left, curve around the top, and then flow down towards the bottom right, creating a sense of movement and creativity. The lines are thick and have a slightly irregular, hand-drawn feel.

TSF Earthworks Solutions

2025
Brochure

Project Areas

In this area we have the ability to execute different types of projects. Ranging from improving designs to proposing ideas for evaluation, development, and execution of these.

About Us

Mission

To provide technical solutions of exceptional value and spatial understanding, with creative and environmentally friendly ideas.

Vision

To be leaders in sustainable 3D solutions in the mining industry using the existing technologies in the market.

Values

- ✓ Innovation
- ✓ Trust
- ✓ Reliable
- ✓ Service excellence
- ✓ Respect

We are a company that develops solutions.
We adapt to the needs of our customers. We provide the value of differentiated experience in the segment of 3D technical solutions and spatial understanding, minimizing the potential impact on the environment and delivering a social benefit to the communities.

Our Services

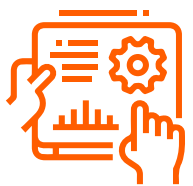

Consultancy

We have a differentiating advantage in the segment of development of technical solutions and spatial understanding through 3D modeling and 4D visualization.

3D Modeling and 4D Visualization

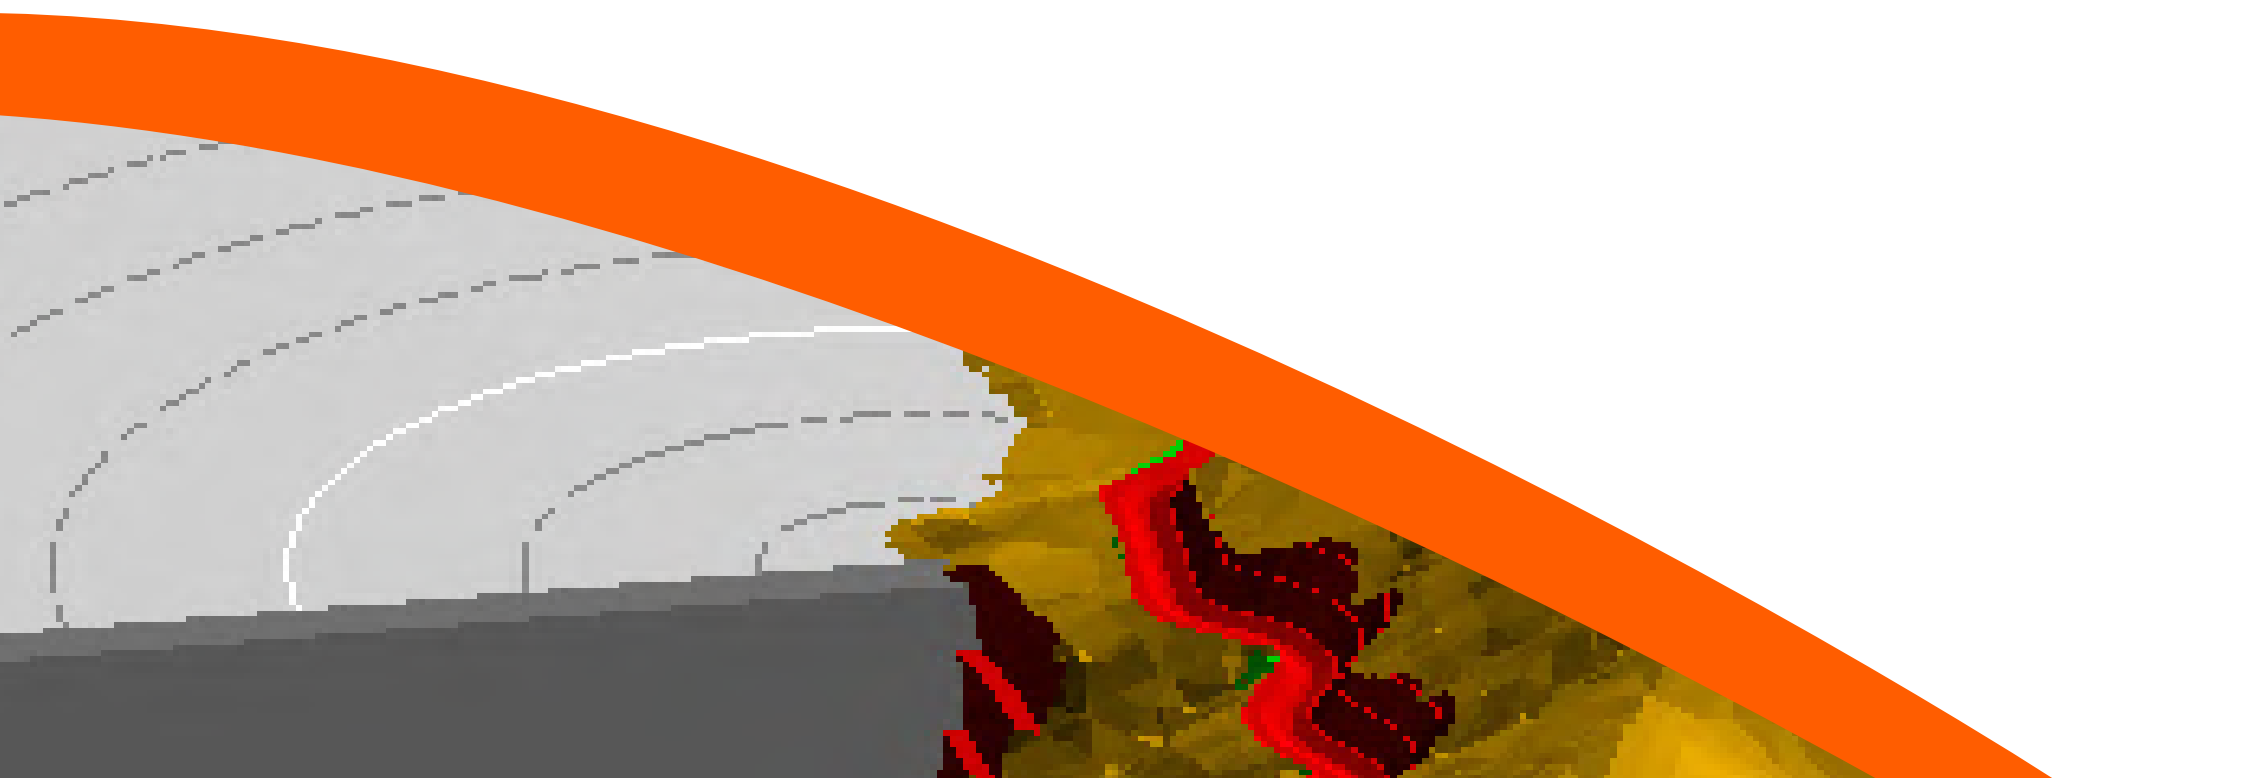

- Dam System
- Drainage System
- Surface Water Management System
- Contact Water Management System
- Tailings Transportation and Deposition System
- Water Reclaim System

Audit Services

- Material progress control
- Engineering design comparison v/s as-built
- Geometric review of third-party designs.
